Course Name: Mobile Computing

Experiment 6: Mobile Network Handoff Simulation Using Figma

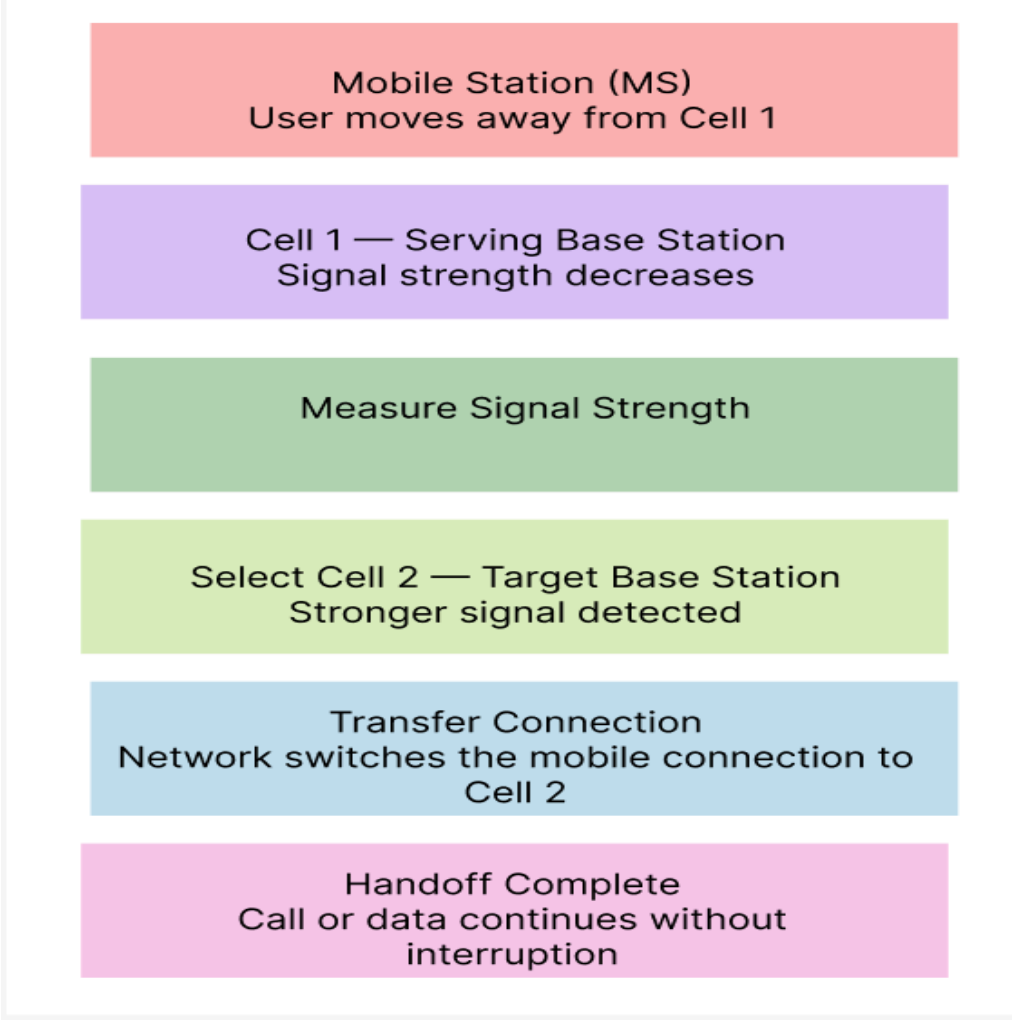

Aim: To simulate a handoff scenario in a mobile network and visualize the process using Figma.

Procedure:

1. Open Figma and create a new design file.
2. Create a frame and add the title **"Mobile Network Handoff Process."**
3. Draw a box representing the Mobile Station (MS).
4. Draw two boxes representing Cell 1 (Serving Cell) and Cell 2 (Target Cell).
5. Connect the Mobile Station to Cell 1 using arrows.
6. Show the mobile device moving from Cell 1 toward Cell 2.
7. Add a step indicating that the signal strength of Cell 1 decreases.
8. Show Cell 2 being selected because it has a stronger signal.
9. Connect the mobile device to Cell 2 using arrows to represent the handoff.
10. Apply different colors and labels, then use Prototype mode to demonstrate the handoff process.

Output:

Result: A visual representation of the mobile network handoff process was successfully created using Figma, illustrating the transfer of a mobile connection from the serving cell to the target cell.
