Experiment 6: Cellular System Performance Dashboard

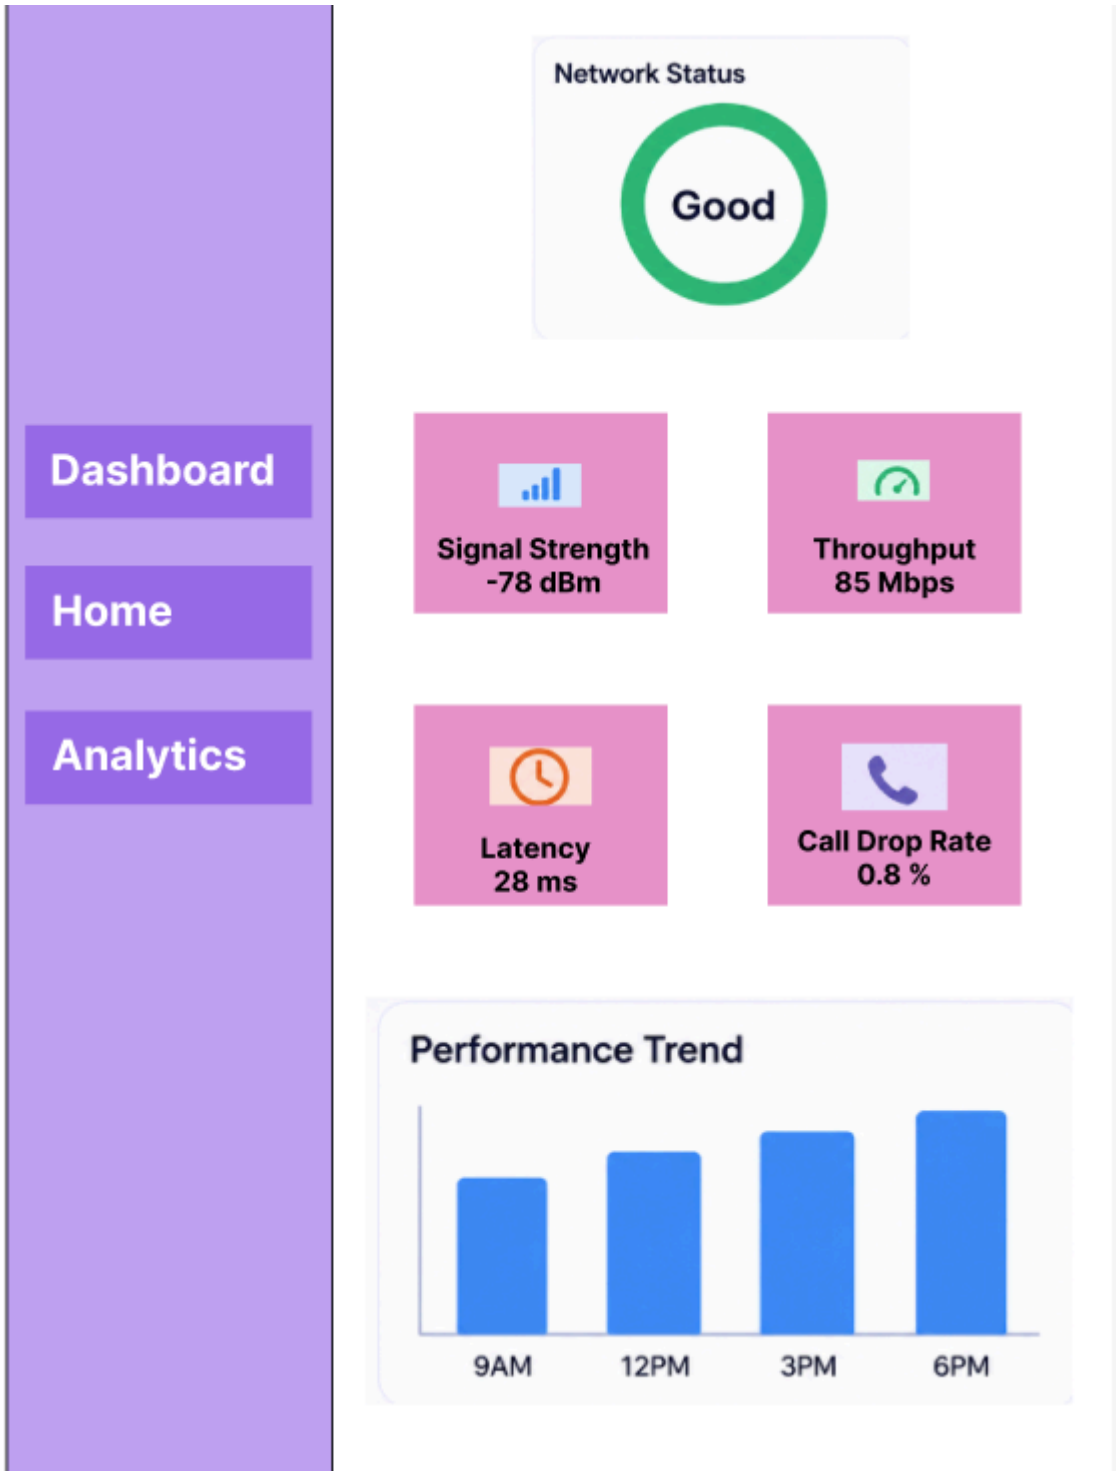

Aim: To design a dashboard prototype in Figma displaying the performance criteria of a cellular system.

Procedure:

1. Open Figma and create a new design file.
2. Create a desktop frame and add a title.
3. Design cards for signal strength, throughput, latency, and call drop rate.
4. Add a simple bar chart to display performance trends.
5. Use different colors, shapes, and text to make the dashboard clear.
6. Arrange all elements neatly.

Output:

Result: A simple cellular system performance dashboard was designed in Figma to display important network performance indicators.
